Final Report : Integration of Taurus Data Logger

File # : 006SQ.23440-9-9076
Financial Code : 234-131-000000-505703-0433
Report Date : Dec. 11, 1989

The Taurus Data Logger was integrated and tested with the CARS data acquisition system. More difficulty than expected was encountered due to undocumented performance limitations in the Taurus hardware.

In the end the requirement that Taurus data collection be synchronized with the 10 Hz. collection of other CARS data ~~was~~ had to be relaxed and the Taurus data is now being collected independently of the spectral data rate.
